### Approval Plan System – acquisition process without media discontinuity

“A high level of consulting and service competence for our corporate clients is very important to us. With the E-Procurement System Newbooks.biz we can meet exactly these requirements. By taking over our corporate design, the integration of the Mayersche catalogue and the connection to our own ERP system, we have an individualised and first-class solution in use, which can be very well integrated into the other systems used at Mayersche Business.”

**Nicole Keil**  
CEO  
Mayersche Business

“Bibliographic data from the Newbooks Catalogues - comprehensively enriched and precisely classified. This is quality with which we can score points with our customers!”

**Christoph Kaeder**  
WebShop Manager  
Schweitzer Fachinformationen

“We were most impressed by the simplicity with which the NEWBOOKS Approval Plan System was integrated seamlessly into our processes and offerings. Our library customers appreciate very much that they receive precisely the title information they need.”
