

**For Immediate Release**  
**Press Information – 13 March 2018**

## **Automated Delivery of eBook copies ('Electronic Publications') to the German National Library**

**COLOGNE – NEWBOOKS Solutions offers publishers to deliver eBook copies ('electronic publications') and related bibliographic information to the German National Library automatically.**

The delivery to the German National Library is carried out via a special interface (Hotfolder procedure with FTP/WebDAV interface) as part of the NEWBOOKS Metadata Management.

The service offered by NEWBOOKS Solutions includes:

- Automated metadata announcement (optional web-based title maintenance of metadata)
- Automated delivery of eBook deposit copies ('electronic publications')
- Server hosting of electronic publications (including encryption)
- Maintenance and support.

### **Easy Setup**

The publisher imports its metadata in ONIX 2.1 or Excel format as well as the eBook full texts into the interface provided by NEWBOOKS.

## **What our Clients Say**

"With the automated delivery of electronic publications to the German National Library, I've found just the right service provider with NEWBOOKS Solutions. This service eliminates the need for manual sending, thus saving a considerable amount of time and resources for us." (Philipp Griesmeier, VDE Verlag GmbH)

## **About NEWBOOKS Solutions**

NEWBOOKS Solutions GmbH (Cologne) is one of the German publishing industry's leading software providers, developing solutions for all sectors of the publishing industry at a time of rapid transformation driven by digitization. The company is focused on developing and administering systems for publishers, booksellers, wholesalers and library suppliers in both the German and international markets.

The company was founded by Moritz Hodde in 2003 and quickly developed into one of the industry's leading providers of high-quality metadata and software solutions. Collaboration with the software provider iucon quickly led to development of a range of new title alerting services based on the NEWBOOKS Catalogue containing both German and English bibliographic data, an approval plan system for library suppliers, an industry-wide solution for the ONIX 3.0 import of title data and the new title announcement and ordering system «SARA» for Springer Nature.

In 2013 Moritz Hodde and Amr Osman founded NEWBOOKS Solutions together with Stefan Schwedt and Björn Stude. Since then the company has developed ground-breaking solutions for the industry such as VLB-TIX, the standard new title announcement service for the German-speaking publishing industry. With its ONIX 3.0 import and export systems NEWBOOKS Solutions has become one of the pioneers in the introduction and implementation of the book industry standard.

In June 2016 NEWBOOKS Solutions received the «MarkLogic Partner Excellence Award» in London. New services and products, e.g. Smart Data projects, Virtual Reality application development, and the new tool «Library Monitoring», complete NEWBOOKS' product range.
