

# Digital Accessibility

Automated Solution within 48 Hours

We help publishers, booksellers, and service providers efficiently implement digital accessibility requirements for their websites. The **digi-smartPlugin** software automatically detects and corrects accessibility issues while dynamically adjusting CSS elements to ensure optimal contrast, font sizes, and spacing. A successful implementation can be seen on the website of **C.H.Beck**:

For Your Website

- Standards WCAG 2.2
- EN 301549
- BITV
- GDPR

**digi-smartPlugin** eliminates the need for time-consuming and costly manual adjustments. Within a short time, your website becomes accessible to all users—regardless of individual limitations.

Newbooks provided us with a straightforward and efficient solution to enhance our website’s accessibility. The integration process of the software **digi-smartPlugin** was impressively fast, and the AI-driven automation significantly reduced both time and costs. We now have peace of mind knowing that our website complies with WCAG standards.

## Accessible Documents at the Push of a Button!

### Accessible Publications with upCast

Creating accessible PDF, EPUB, and HTML documents has never been easier

**Effortless Conversion:** With upCast, you can easily convert your authors' Word documents into a structured XML format at the push of a button, preserving all key document structures for efficient publishing workflows.

**Accessible Outputs:** Generate compliant PDF, EPUB, and HTML outputs directly from the XML, ensuring accessibility and tailoring to your layout preferences.

**Workflow Optimisation:** upCast optionally integrates with PIM.red to model workflows, manage processes, store documents with their metadata, and connect your publishing operations with distribution channels and partners through established interfaces.

We help you create an accessible and inclusive online environment.
